Andes Virus Gn Base Protein (C-His)

Catalog Number:	607301, 607302
Size:	25 µg, 100 µg
Target Name:	Andes virus glycoprotein Gn base Gn, Andes virus Gn base domain, ANDV Gn base protein, Andes orthoh
Regulatory Status:	RUO

PRODUCT DETAILS

Application:	ELISA, BLI
Format:	Liquid, Purified
Expression Host:	CHO
Species:	Andes Virus
accession number:	AF291703.2
Sources:	Recombinant Andes Virus Glycoprotein Gn Base (Ala375–Val484) with a C-terminal histidine tag is expressed in CHO cells. The protein is derived from the Andes virus strain Chile-9717869.
Molecular Weight:	This protein has a predicted molecular weight of 12–14 kDa (without glycosylation).
Affinity Tag:	C-His
Purity:	>95% based on SDS-PAGE under reducing condition
Formulation:	1xPBS buffer, pH7.4, 0.22 µm filtered
Endotoxin level:	Not tested
Protein Concentration:	25µg size is bottled at 0.2mg/mL concentration. 100 µg size is supplied at a lot-specific concentration.
Storage and Handling:	Briefly centrifuge the vial upon receipt. An unopened vial can be stored at 4°C for up to 2 weeks, or at -20°C or below for up to six months. The protein may be further diluted to 0.1 mg/mL using 0.22 µm-filtered PBS buffer (pH 7.4). For long-term storage, the diluted stock solution should be aliquoted and stored at ≤ –70°C to minimize freeze-thaw cycles. If additional dilution is required, carrier proteins such as FBS or BSA should be added to maintain protein stability.
