BACKGROUND INFORMATION

The DYKDDDDK Tag antibody specifically detects proteins containing the DYKDDDDK epitope, commonly known as the FLAG® tag (originally from Sigma®). It recognizes the DYKDDDDK sequence when fused to either the N-terminus or C-terminus of the target protein.

PRODUCT DATA

Multi-tag protein (catalog 603901) is coated at 100ng/mL (10ng/well). Anti-DYKDDDDK Antibody(clone 1002AH1) can detect the Multi-tag protein in the dose dependent manner. For ELISA application, this antibody can be used at 0.01 ug/mL or lower as the detection antibody.

Multi-tag (including DYKDDDDK tag) transmembrane protein transfected CHO cells were stained either purified Anti-DYKDDDDK antibody clone 1002AH1 (color-filled histogram) or an isotype control (gray histogram), followed by PE anti-human IgG secondary antibody.
